

# TTP

1. Chooses  $Salt$  and calculates  
 $Salted = Salt \text{ XOR } R_r$

$\{Salted, C_r\}$

2. Calculates  $R_r$  and  
 $Salt = Salted \text{ XOR } R_r$ ,  
and stores  $Salt$

3. Chooses  $C_{i+1}$

$C_{i+1}$

4. Calculates  $R_{i+1}$  and  
 $Salted_{R_{i+1}} = Salt \text{ XOR } R_{i+1}$

$Salted_{R_{i+1}}$

5. Calculates  
 $R_{i+1} = Salt \text{ XOR } Salted_{R_{i+1}}$ ,  
and stores  $\{C_{i+1}, R_{i+1}\}$
